

### 1. GETTING STARTED

- We'll walk you through the study like what you will **see, feel, and hear**.
- You'll learn how your participation helps **advance science!**
- If you're up for the study, you'll sign the **consent forms**.

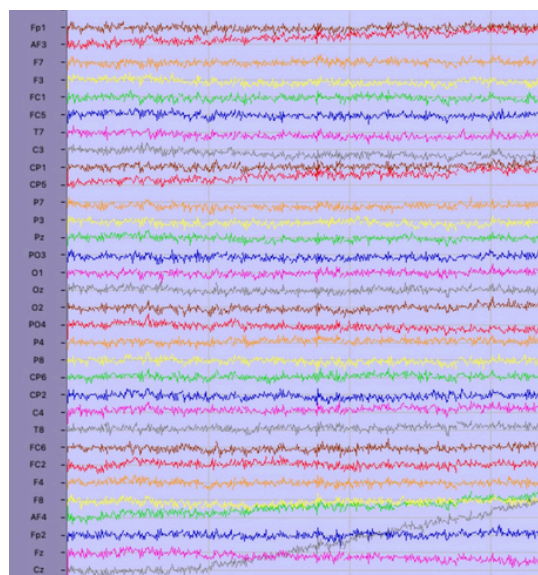

### 2. EEG SET UP

- Next, we'll measure your head to find the **EEG cap** that **fits you best!**
- We'll apply gel to the cap's sensors so we can measure your brain's activity.

### 3. STUDY BEGINS!

- You'll listen to auditory sounds like **songs, or stories** while we record your brain responses in real time.
- For longer experiments, we offer **snacks!**
- Afterward, **you'll get to see your own brain activity!**
