

Infant & Child EEG Experience

1

GETTING STARTED!

- We'll walk you through what your child will **feel, see, and hear**.
- You'll review and sign a **consent form** before we begin.
- Participation is completely **voluntary**, you and your child can stop anytime!

2

YOUR CHILD & EEG!

- Measure your child's head to find the most **comfortable cap**.
- **Soft**, tiny **sensors** are on the cap & a little **baby-safe** gel is put on the sensors. This helps us read your baby's brain activity.
- It is **gentle, safe, and harmless!**

3

LET THE FUN BEGIN!

- Your child listens to **stories** or **songs** & some studies have fun visuals on screens.
- You'll stay together: **your child sits on your lap!**
- At the end, your little scientist gets a **prize!**
